OISTER
Optical and Infrared Synergetic Telescopes for Education and Research
光赤外線天文学大学間連携事業

Optical and Infrared Synergetic Telescopes for Education and Research (OISTER)

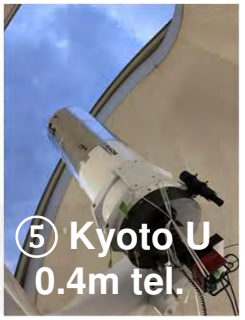

Daisaku Nogami (Kyoto University)
on behalf of OISTER

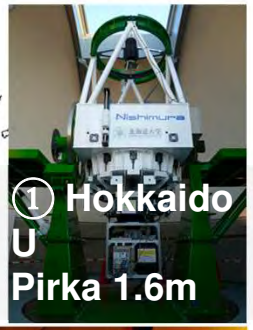

OISTER
Optical and Infrared Synergetic Telescopes for Education and Research
光赤外線天文学大学間連携事業

Institutes and telescopes

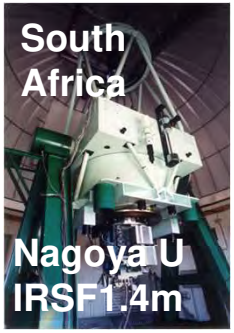

- We can perform simultaneous photometry, spectroscopy, polarimetry and spectropolarimetry in the optical and infrared wavelengths.
- We can avoid weather risks by using multiple telescopes.

OISTER
Optical and Infrared Synergetic Telescopes for Education and Research
光赤外線天文学大学間連携事業

Education for (under-)graduate students

- Data analysis workshop for beginners (photometry, spectroscopy…)
- Seminars on science and instrumentation online and in person
- Short-term stay training program in another institute
- Intensive course on modern statistics and machine learning
- Annual meeting with all institutes participating

and so on…

OISTER
Optical and Infrared Synergetic Telescopes for Education and Research
光赤外線天文学大学間連携事業

International partnership

If you are interested in participation in OISTER, please feel free to make a contact with me in person at this meeting or by e-mail!

E-mail: nogami@kusastro.kyoto-u.ac.jp
